International application No.

PCT/KR2004/002467

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-9	YES
	Claims		NO
Inventive step (IS)	Claims	1-9	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-9	YES
	Claims		NO

2. Citations and explanations :

Reference is made to the following documents:

D1 = JP 2002280988 A

Novelty

the two inventions are different in that D1 doesn't teach that the inputted signals are twice mixed, digitally mixed and quadrature-mixed again. Therefore, the invention according to claims 1-9 is considered to be novel.

inventive step

The invention according to claims 1-9 relates to an apparatus and a method for digitally implementing a wideband multicarrier.

D1 discloses a method and a device for receiving both single carrier and multicarrier with high cost performance.

As compared with D1, there is a similarity between the present invention and the device in D1 in that multicarrier modulation with high cost performance is implemented.

On the other hand, the invention is different from D1 in that the inputted signals are mixed twice, digitally mixed and quadrature-mixed again.

Therefore, claims 1-9 of this invention lack an inventive step under Article 33(3) as being obvious over D1.

Industrial Applicability

The subject matter of claims 1-9 fulfills the requirements of Article 33(4) PCT because it is useful.
